

**Chapter 43.21F RCW
STATE ENERGY OFFICE**

Sections

43.21F.010	Legislative findings and declaration.
43.21F.025	Definitions.
43.21F.045	Duties of department—Transfer of powers and duties relating to energy education, applied research, technology transfer, and energy efficiency in public buildings.
43.21F.055	Intervention in certain regulatory proceedings prohibited—Application to energy facility site evaluation council—Avoidance of duplication of activity.
43.21F.060	Additional duties and authority of department—Obtaining information—Confidentiality, penalty—Receiving and expending funds.
43.21F.062	Renewable energy facilities in coastal and estuarine marine waters—Guidance.
43.21F.088	State energy strategy—Principles—Implementation.
43.21F.090	State energy strategy—Review and report to legislature—Energy strategy advisory committee.
43.21F.092	Promising clean energy technologies—Fusion energy.
43.21F.100	Clean energy facilities—Distributed energy priorities.
43.21F.400	Western interstate nuclear compact—Entered into—Terms.
43.21F.405	Western interstate nuclear compact—State board member—Appointment, term—May designate representative.
43.21F.410	Western interstate nuclear compact—State and local agencies and officers to cooperate.
43.21F.415	Western interstate nuclear compact—Bylaws, amendments to, filed with secretary of state.
43.21F.420	Western interstate nuclear compact—Application of state laws, benefits, when persons dispatched to another state.

RCW 43.21F.010 Legislative findings and declaration. (1) The legislature finds that the state needs to implement a comprehensive energy planning process that:

(a) Is based on high quality, unbiased analysis;

(b) Engages public agencies and stakeholders in a thoughtful, deliberative process that creates a cohesive plan that earns sustained support of the public and organizations and institutions that will ultimately be responsible for implementation and execution of the plan; and

(c) Establishes policies and practices needed to ensure the effective implementation of the strategy.

(2) The legislature further finds that energy drives the entire modern economy from petroleum for vehicles to electricity to light homes and power businesses. The legislature further finds that the nation and the world have started the transition to a clean energy economy, with significant improvements in energy efficiency and investments in new clean and renewable energy resources and technologies. The legislature further finds this transition may increase or decrease energy costs and efforts should be made to mitigate cost increases.

(3) The legislature finds and declares that it is the continuing purpose of state government, consistent with other essential considerations of state policy, to foster wise and efficient energy use and to promote energy self-sufficiency through the use of indigenous and renewable energy sources, consistent with the promotion of reliable energy sources, the general welfare, and the protection of environmental quality.

(4) The legislature further declares that a successful state energy strategy must balance three goals to:

(a) Maintain competitive energy prices that are fair and reasonable for consumers and businesses and support our state's continued economic success;

(b) Increase competitiveness by fostering a clean energy economy and jobs through business and workforce development; and

(c) Meet the state's obligations to reduce greenhouse gas emissions. [2010 c 271 s 401; 1975-'76 2nd ex.s. c 108 s 1.]

Purpose—Effective date—2010 c 271: See notes following RCW 43.330.005.

Severability—1975-'76 2nd ex.s. c 108: "If any provision of this 1976 amendatory act, or its application to any person or circumstance is held invalid, the remainder of the act, or the application of the provision to other persons or circumstances is not affected." [1975-'76 2nd ex.s. c 108 s 45.]

Effective date—1975-'76 2nd ex.s. c 108: "This 1976 amendatory act is necessary for the immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions, and shall take effect March 15, 1976." [1975-'76 2nd ex.s. c 108 s 46.]

RCW 43.21F.025 Definitions. (1) "Assistant director" means the assistant director of the department of commerce responsible for energy policy activities;

(2) "Department" means the department of commerce;

(3) "Director" means the director of the department of commerce;

(4) "Distributor" means any person, private corporation, partnership, individual proprietorship, utility, including investor-owned utilities, municipal utility, public utility district, joint operating agency, or cooperative, which engages in or is authorized to engage in the activity of generating, transmitting, or distributing energy in this state;

(5) "Energy" means petroleum or other liquid fuels; natural or synthetic fuel gas; solid carbonaceous fuels; fissionable nuclear material; electricity; solar radiation; geothermal resources; hydropower; organic waste products; wind; tidal activity; any other substance or process used to produce heat, light, or motion; or the savings from nongeneration technologies, including conservation or improved efficiency in the usage of any of the sources described in this subsection;

(6) "Person" means an individual, partnership, joint venture, private or public corporation, association, firm, public service company, political subdivision, municipal corporation, government

agency, public utility district, joint operating agency, or any other entity, public or private, however organized; and

(7) "State energy strategy" means the document developed and updated by the department as allowed in RCW 43.21F.090. [2010 c 271 s 402. Prior: 2009 c 565 s 27; 1996 c 186 s 102; 1994 c 207 s 2; 1987 c 330 s 501; 1981 c 295 s 2.]

Purpose—Effective date—2010 c 271: See notes following RCW 43.330.005.

Findings—Intent—Part headings not law—Effective date—1996 c 186: See notes following RCW 43.330.904.

Finding—1994 c 207: "The legislature finds that the state energy strategy presented to the legislature in 1993 was developed by a dedicated and talented committee of hard-working representatives of the industries and people of this state and that the strategy document should serve to guide energy-related policy decisions by the legislature and other entities within this region." [1994 c 207 s 1.]

Construction—Application of rules—Severability—1987 c 330: See notes following RCW 28B.12.050.

RCW 43.21F.045 Duties of department—Transfer of powers and duties relating to energy education, applied research, technology transfer, and energy efficiency in public buildings. (1) The department shall supervise and administer energy-related activities as specified in RCW 43.330.904 and shall advise the governor and the legislature with respect to energy matters affecting the state.

(2) In addition to other powers and duties granted to the department, the department shall have the following powers and duties:

(a) Prepare and update contingency plans for securing energy infrastructure against all physical and cybersecurity threats, and for implementation in the event of energy shortages or emergencies. The plans shall conform to chapter 43.21G RCW and shall include procedures for determining when these shortages or emergencies exist, the state officers and agencies to participate in the determination, and actions to be taken by various agencies and officers of state government in order to reduce hardship and maintain the general welfare during these emergencies. The department shall coordinate the activities undertaken pursuant to this subsection with other persons. The components of plans that require legislation for their implementation shall be presented to the legislature in the form of proposed legislation at the earliest practicable date. The department shall report to the governor and the legislature on probable, imminent, and existing energy shortages, and shall administer energy allocation and curtailment programs in accordance with chapter 43.21G RCW.

(b) Establish and maintain a central repository in state government for collection of existing data on energy resources, including:

(i) Supply, demand, costs, utilization technology, projections, and forecasts;

(ii) Comparative costs of alternative energy sources, uses, and applications; and

(iii) Inventory data on energy research projects in the state conducted under public and/or private auspices, and the results thereof.

(c) Coordinate federal energy programs appropriate for state-level implementation, carry out such energy programs as are assigned to it by the governor or the legislature, and monitor federally funded local energy programs as required by federal or state regulations.

(d) Develop energy policy recommendations for consideration by the governor and the legislature.

(e) Provide assistance, space, and other support as may be necessary for the activities of the state's two representatives to the Pacific northwest electric power and conservation planning council. To the extent consistent with federal law, the director shall request that Washington's councilmembers request the administrator of the Bonneville power administration to reimburse the state for the expenses associated with the support as provided in the Pacific Northwest Electric Power Planning and Conservation Act (P.L. 96-501).

(f) Cooperate with state agencies, other governmental units, and private interests in the prioritization and implementation of the state energy strategy elements and on other energy matters.

(g) Serve as the official state agency responsible for coordinating implementation of the state energy strategy.

(h) No later than December 1, 1982, and by December 1st of each even-numbered year thereafter, prepare and transmit to the governor and the appropriate committees of the legislature a report on the implementation of the state energy strategy and other important energy issues, as appropriate.

(i) Provide support for increasing cost-effective energy conservation, including assisting in the removal of impediments to timely implementation.

(j) Provide support for the development of cost-effective energy resources including assisting in the removal of impediments to timely construction.

(k) Adopt rules, under chapter 34.05 RCW, necessary to carry out the powers and duties enumerated in this chapter.

(l) Provide administrative assistance, space, and other support as may be necessary for the activities of the energy facility site evaluation council, as provided for in RCW 80.50.030.

(m) Appoint staff as may be needed to administer energy policy functions and manage energy facility site evaluation council activities. These employees are exempt from the provisions of chapter 41.06 RCW.

(3) To the extent the powers and duties set out under this section relate to energy education, applied research, and technology transfer programs they are transferred to Washington State University.

(4) To the extent the powers and duties set out under this section relate to energy efficiency in public buildings they are transferred to the department of enterprise services. [2023 c 124 s 5; 2015 c 225 s 73; 1996 c 186 s 103; 1994 c 207 s 4; 1990 c 12 s 2; 1987 c 505 s 29; 1981 c 295 s 4.]

Findings—Intent—Part headings not law—Effective date—1996 c 186: See notes following RCW 43.330.904.

Finding—1994 c 207: See note following RCW 43.21F.025.

Effective date—1990 c 12: See note following RCW 80.50.030.

RCW 43.21F.055 Intervention in certain regulatory proceedings prohibited—Application to energy facility site evaluation council—Avoidance of duplication of activity. The department shall not intervene in any regulatory proceeding before the Washington utilities and transportation commission or proceedings of utilities not regulated by the commission. Nothing in this chapter abrogates or diminishes the functions, powers, or duties of the energy facility site evaluation council pursuant to chapter 80.50 RCW, the utilities and transportation commission pursuant to Title 80 RCW, or other state or local agencies established by law.

The department shall avoid duplication of activity with other state agencies and officers and other persons. [1996 c 186 s 104; 1981 c 295 s 5.]

Findings—Intent—Part headings not law—Effective date—1996 c 186: See notes following RCW 43.330.904.

RCW 43.21F.060 Additional duties and authority of department—Obtaining information—Confidentiality, penalty—Receiving and expending funds. In addition to the duties prescribed in RCW 43.21F.045, the department shall have the authority to:

(1) Obtain all necessary and existing information from energy producers, suppliers, and consumers, doing business within the state of Washington, from political subdivisions in this state, or any person as may be necessary to carry out the provisions of chapter 43.21G RCW: PROVIDED, That if the information is available in reports made to another state agency, the department shall obtain it from that agency: PROVIDED FURTHER, That, to the maximum extent practicable, informational requests to energy companies regulated by the utilities and transportation commission shall be channeled through the commission and shall be accepted in the format normally used by the companies. Such information may include but not be limited to:

- (a) Sales volume;
- (b) Forecasts of energy requirements; and
- (c) Energy costs.

Notwithstanding any other provision of law to the contrary, information furnished under this subsection shall be confidential and maintained as such, if so requested by the person providing the information, if the information is proprietary.

It shall be unlawful to disclose such information except as hereinafter provided. A violation shall be punishable, upon conviction, by a fine of not more than one thousand dollars for each offense. In addition, any person who wilfully or with criminal negligence, as defined in RCW 9A.08.010, discloses confidential information in violation of this subsection may be subject to removal from office or immediate dismissal from public employment notwithstanding any other provision of law to the contrary.

Nothing in this subsection prohibits the use of confidential information to prepare statistics or other general data for publication when it is so presented as to prevent identification of particular persons or sources of confidential information.

(2) Receive and expend funds obtained from the federal government or other sources by means of contracts, grants, awards, payments for services, and other devices in support of the duties enumerated in this chapter. [1996 c 186 s 105; 1981 c 295 s 6; 1975-'76 2nd ex.s. c 108 s 6.]

Findings—Intent—Part headings not law—Effective date—1996 c 186: See notes following RCW 43.330.904.

RCW 43.21F.062 Renewable energy facilities in coastal and estuarine marine waters—Guidance. (1) In addition to the duties prescribed in RCW 43.21F.045, the department must develop guidance applicable to all state agencies for achieving a unified state position upon matters involving the siting and operation of renewable energy facilities in the state's coastal and estuarine marine waters. The guidance must provide procedures for coordinating the views and responsibilities of any state agency with jurisdiction or expertise over the matter under consideration, which may include federal policy proposals, activities, permits, licenses, or the extension of funding for activities in or affecting the state's marine waters. In developing the guidance, the director must consult with agencies with primary responsibilities for permitting and management of marine waters and bedlands, including the departments of natural resources, ecology, transportation, and fish and wildlife, and the state parks and recreation commission, the Puget Sound partnership, and the energy facility site evaluation council. The director must also consult and incorporate relevant information from the regional activities related to renewable energy siting in marine waters, including those under the west coast governors' agreement on ocean health.

(2) The director may not commence development of the guidance until federal, private, or other nonstate funding is secured for this activity. The director must adopt the guidance within one year of securing such funds.

(3) This section is intended to promote consistency and multiple agency coordination in developing positions and exercising jurisdiction in matters involving the siting and operation of renewable energy facilities and does not diminish or abrogate the authority or jurisdiction of any state agency over such matters established under any other law. [2010 c 145 s 9.]

RCW 43.21F.088 State energy strategy—Principles—Implementation. (1) The state shall use the following principles to guide development and implementation of the state's energy strategy and to meet the goals of RCW 43.21F.010:

(a) Pursue all cost-effective energy efficiency and conservation as the state's preferred energy resource, consistent with state law;

(b) Ensure that the state's energy system meets the health, welfare, and economic needs of its citizens with particular emphasis on meeting the needs of low-income and vulnerable populations;

(c) Maintain and enhance economic competitiveness by ensuring an affordable and reliable supply of energy resources and by supporting clean energy technology innovation, access to clean energy markets worldwide, and clean energy business and workforce development;

(d) Reduce dependence on fossil fuel energy sources through improved efficiency and development of cleaner energy sources, such as bioenergy, low carbon energy sources, and natural gas, and leveraging the indigenous resources of the state for the production of clean energy;

(e) Improve efficiency of transportation energy use through advances in vehicle technology, increased system efficiencies, development of electricity, biofuels, and other clean fuels, and regional transportation planning to improve transportation choices;

(f) Meet the state's statutory greenhouse gas limits and environmental requirements as the state develops and uses energy resources;

(g) Build on the advantage provided by the state's clean regional electrical grid by expanding and integrating additional carbon-free and carbon-neutral generation, and improving the transmission capacity serving the state;

(h) Make state government a model for energy efficiency, use of clean and renewable energy, and greenhouse gas-neutral operations; and

(i) Maintain and enhance our state's existing energy infrastructure.

(2) The department shall:

(a) During energy shortage emergencies, give priority in the allocation of energy resources to maintaining the public health, safety, and welfare of the state's citizens and industry in order to minimize adverse impacts on their physical, social, and economic well-being;

(b) Develop and disseminate impartial and objective energy information and analysis, while taking full advantage of the capabilities of the state's institutions of higher education, national laboratory, and other organizations with relevant expertise and analytical capabilities;

(c) Actively seek to maximize federal and other nonstate funding and support to the state for energy efficiency, renewable energy, emerging energy technologies, and other activities of benefit to the state's overall energy future; and

(d) Monitor the actions of all agencies of the state for consistent implementation of the state's energy policy including applicable statutory policies and goals relating to energy supply and use. [2010 c 271 s 403.]

Purpose—Effective date—2010 c 271: See notes following RCW 43.330.005.

RCW 43.21F.090 State energy strategy—Review and report to legislature—Energy strategy advisory committee. (1) The department shall review the state energy strategy by December 31, 2020, and at least once every eight years thereafter, subject to funding provided for this purpose, for the purpose of aligning the state energy strategy with the requirements of RCW 43.21F.088 and chapters 19.285 and 19.405 RCW, and the emission reduction targets recommended by the department of ecology under RCW 70A.45.040. The department must establish an energy strategy advisory committee for each review to provide guidance to the department in conducting the review. The membership of the energy strategy advisory committee must consist of the following:

- (a) One person recommended by investor-owned electric utilities;
- (b) One person recommended by investor-owned natural gas utilities;
- (c) One person employed by or recommended by a natural gas pipeline serving the state;
- (d) One person recommended by suppliers of petroleum products;
- (e) One person recommended by municipally owned electric utilities;
- (f) One person recommended by public utility districts;
- (g) One person recommended by rural electrical cooperatives;
- (h) One person recommended by industrial energy users;
- (i) One person recommended by commercial energy users;
- (j) One person recommended by agricultural energy users;
- (k) One person recommended by the association of Washington cities;
- (l) One person recommended by the Washington association of counties;
- (m) One person recommended by Washington Indian tribes;
- (n) One person recommended by businesses in the clean energy industry;
- (o) One person recommended by labor unions;
- (p) Two persons recommended by civic organizations, one of which must be a representative of a civic organization that represents vulnerable populations;
- (q) Two persons recommended by environmental organizations;
- (r) One person representing independent power producers;
- (s) The chair of the energy facility site evaluation council or the chair's designee;
- (t) One of the representatives of the state of Washington to the Pacific Northwest electric power and conservation planning council selected by the governor;
- (u) The chair of the utilities and transportation commission or the chair's designee;
- (v) One member from each of the two largest caucuses of the house of representatives selected by the speaker of the house of representatives; and
- (w) One member from each of the two largest caucuses of the senate selected by the president of the senate.

(2) The chair of the advisory committee must be appointed by the governor from citizen members. The director may establish technical advisory groups as necessary to assist in the development of the strategy. The director shall provide for extensive public involvement throughout the development of the strategy.

(3) Upon completion of a public hearing regarding the advisory committee's advice and recommendations for revisions to the energy strategy, a written report shall be conveyed by the department to the governor and the appropriate legislative committees. The energy strategy advisory committee established under this section must be dissolved within three months after their written report is conveyed.

[2020 c 20 s 1042; 2019 c 288 s 22; 1996 c 186 s 106; 1994 c 207 s 5.]

Findings—Intent—Effective date—2019 c 288: See RCW 19.405.010 and 19.405.901.

Findings—Intent—Part headings not law—Effective date—1996 c 186: See notes following RCW 43.330.904.

Finding—1994 c 207: See note following RCW 43.21F.025.

RCW 43.21F.092 Promising clean energy technologies—Fusion energy. (1) In addition to the principles guiding the development and implementation of the state energy strategy described in RCW 43.21F.088, the state must ensure that the pursuit of cleaner energy sources actively includes and supports innovative, emerging, and promising clean energy technologies, such as fusion energy.

(2) For the purposes of this section, "fusion energy" means energy production derived directly or indirectly from the merger of atomic nuclei.

(3) The legislature finds that fusion energy is a rapidly advancing clean energy technology and that Washington is poised to become a world leader in fusion energy development. [2024 c 346 s 1.]

Fusion energy work group—2024 c 346: "The energy facility site evaluation council and the department of health shall establish a fusion energy work group of state agencies including, but not limited to, the department of commerce, the department of ecology, the office of the governor, and the military department to identify and evaluate new and existing permitting, siting, licensing, and registration pathways for producing fusion energy. The fusion energy work group shall involve the regulated community throughout the process. The fusion energy work group shall provide an initial report to the governor and legislature by December 1, 2024." [2024 c 346 s 2.]

RCW 43.21F.100 Clean energy facilities—Distributed energy priorities. (1) The following categories of clean energy facilities and nonproject activities that reduce environmental impacts are determined to constitute distributed energy priorities:

(a) Solar energy generation and accompanying energy storage and electricity transmission and distribution, including vehicle charging equipment, when such facilities are located:

(i) Within the easement, right-of-way, or existing footprint of electrical transmission facilities or electric utility infrastructure sites;

(ii) Within the easement, right-of-way, or existing footprint of a state highway or city or county road;

(iii) On structures over or enclosing irrigation canals, drainage ditches, and irrigation, agricultural, livestock supply, stormwater, or wastewater reservoirs or similar impoundments of state waters that do not host salmon or steelhead trout runs;

(iv) On elevated structures over parking lots;

(v) On lands within a transportation facility, including but not limited to airports and railroad facilities, or restricted from other developments by transportation facility operations;

(vi) On closed or capped portions of landfills;

(vii) On reclaimed or former surface mine lands or contaminated sites that have been remediated under chapter 70A.305 RCW or the federal comprehensive environmental response, compensation, and liability act (42 U.S.C. Sec. 9601 et seq.) in a manner that includes an asphalt or soil cap;

(viii) As an agrivoltaic facility; and

(ix) On existing structures;

(b) Wind energy generation that is not a utility-scale wind energy facility as defined in RCW 70A.550.010, and accompanying energy storage and transmission and distribution equipment, including vehicle charging equipment;

(c) Energy storage, when such facilities are located:

(i) Within the easement, right-of-way, or existing footprint of electrical transmission facilities or electric utility infrastructure sites;

(ii) Within the easement, right-of-way, or existing footprint of a state highway or city or county road;

(iii) On lands within a transportation facility, including but not limited to airports and railroad facilities, or restricted from other developments by transportation facility operations;

(iv) On closed or capped portions of landfills;

(v) On reclaimed or former surface mine lands;

(vi) On contaminated sites that have been remediated under chapter 70A.305 RCW or the federal comprehensive environmental response, compensation, and liability act (42 U.S.C. Sec. 9601 et seq.) in a manner that includes an asphalt or soil cap; and

(vii) On or in existing structures;

(d) Microgrids. For purposes of this section, "microgrids" are a group of interconnected loads, energy generation, and other distributed energy resources that act as a single controllable entity with respect to the electric grid. A microgrid can operate both autonomously from and synchronous with the central electric grid;

(e) Programs that reduce electric demand, manage the level or timing of electricity consumption, or provide electricity storage, renewable or nonemitting electric energy, capacity, or ancillary services to an electric utility and that are located on the distribution system, any subsystem of the distribution system, or behind the customer meter, including conservation and energy efficiency; and

(f) Programs that reduce energy demand, manage the level or timing of energy consumption, or provide thermal energy storage.

(2)(a) The department must review and, when appropriate, periodically recommend to the legislature additional types of distributed energy priorities for inclusion on the list under subsection (1) of this section.

(b) The identification of distributed energy priorities in subsection (1) of this section applies to the maximum extent practical under state and federal law, but does not include any development sites or activities prohibited under other state or federal laws.

(3)(a) For purposes of this section, "agrivoltaic facility" means a ground-mounted photovoltaic solar energy system that is designed to be operated coincident with continued productive agricultural use of the land.

(b) Eligible agricultural products and uses include any combination of:

(i) Crop production;

(ii) Grazing;

(iii) Animal husbandry; and

(iv) Apiaries with pollinator habitat that have been designed and installed to enable the agricultural producer the flexibility to change what products are produced, raised, or grown at any point throughout the life of the facility.

(c) An agrivoltaic facility must not permanently or significantly degrade the agricultural or ecological productivity of the land after

the cessation of the operation of the facility or involve the sale of a water right associated with the land.

(d) An agrivoltaic facility must be constructed, installed, and operated to achieve integrated and simultaneous production of both solar energy and marketable agricultural products by an agricultural producer:

(i) On land beneath or between rows of solar panels, or both; and

(ii) As soon as agronomically feasible and optimal for the agricultural producer after the commercial solar operation date, and continuing until facility decommissioning.

(e) Solar panel arrays must be designed and installed in a manner that supports the continuation of a viable farm operation for the life of the array, and must consider, as appropriate, the availability of light, water infrastructure for crops or animals, and panel height and spacing relative to farm machinery needs. [2025 c 265 s 2.]

Findings—Intent—2025 c 265: "The legislature finds that, as Washington works towards meeting its goals under the clean energy transformation act, we see many larger-scale renewable energy projects proposed. These projects can come with significant challenges. This act aims to incentivize the development of local distributed energy resources. This may include expediting installation of small-scale wind energy developments, solar energy developments on landfills, structures, and other developed lands, and the placement of solar panels on agricultural lands that ensure the continued viability of agriculture alongside energy production. The legislature also finds that local economies benefit from distributed energy projects, which can create high quality jobs, provide opportunities for training apprentice workers, and improve grid resilience. The legislature intends to support utilities in investing in local distributed energy resilience by providing greater incentives in the energy independence act for utilities who invest in distributed energy priority projects." [2025 c 265 s 1.]

RCW 43.21F.400 Western interstate nuclear compact—Entered into—Terms. The western interstate nuclear compact is hereby enacted into law and entered into by the state of Washington as a party, and is in full force and effect between the state and any other states joining therein in accordance with the terms of the compact, which compact is substantially as follows:

ARTICLE I. POLICY AND PURPOSE

The party states recognize that the proper employment of scientific and technological discoveries and advances in nuclear and related fields and direct and collateral application and adaptation of processes and techniques developed in connection therewith, properly correlated with the other resources of the region, can assist substantially in the industrial progress of the West and the further development of the economy of the region. They also recognize that optimum benefit from nuclear and related scientific or technological resources, facilities and skills requires systematic encouragement, guidance, assistance, and promotion from the party states on a cooperative basis. It is the policy of the party states to undertake such cooperation on a continuing basis. It is the purpose of this compact to provide the instruments and framework for such a

cooperative effort in nuclear and related fields, to enhance the economy of the West and contribute to the individual and community well-being of the region's people.

ARTICLE II. THE BOARD

(a) There is hereby created an agency of the party states to be known as the "Western Interstate Nuclear Board" (hereinafter called the Board). The Board shall be composed of one member from each party state designated or appointed in accordance with the law of the state which he represents and serving and subject to removal in accordance with such law. Any member of the Board may provide for the discharge of his duties and the performance of his functions thereon (either for the duration of his membership or for any lesser period of time) by a deputy or assistant, if the laws of his state make specific provisions therefor. The federal government may be represented without vote if provision is made by federal law for such representation.

(b) The Board members of the party states shall each be entitled to one vote on the Board. No action of the Board shall be binding unless taken at a meeting at which a majority of all members representing the party states are present and unless a majority of the total number of votes on the Board are cast in favor thereof.

(c) The Board shall have a seal.

(d) The Board shall elect annually, from among its members, a chairman, a vice chairman, and a treasurer. The Board shall appoint and fix the compensation of an Executive Director who shall serve at its pleasure and who shall also act as Secretary, and who, together with the Treasurer, and such other personnel as the Board may direct, shall be bonded in such amounts as the Board may require.

(e) The Executive Director, with the approval of the Board, shall appoint and remove or discharge such personnel as may be necessary for the performance of the Board's functions irrespective of the civil service, personnel or other merit system laws of any of the party states.

(f) The Board may establish and maintain, independently or in conjunction with any one or more of the party states, or its institutions or subdivisions, a suitable retirement system for its full-time employees. Employees of the Board shall be eligible for social security coverage in respect of old age and survivors insurance provided that the Board takes such steps as may be necessary pursuant to federal law to participate in such program of insurance as a governmental agency or unit. The Board may establish and maintain or participate in such additional programs of employee benefits as may be appropriate.

(g) The Board may borrow, accept, or contract for the services of personnel from any state or the United States or any subdivision or agency thereof, from any interstate agency, or from any institution, person, firm or corporation.

(h) The Board may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials and services (conditional or otherwise) from any state or the United States or any subdivision or agency thereof, or interstate agency, or from any institution, person, firm, or corporation, and may receive, utilize, and dispose of the same. The nature, amount and conditions, if any, attendant upon any donation or grant accepted pursuant to this paragraph or upon any borrowing pursuant to paragraph (g) of this Article, together with the identity

of the donor, grantor or lender, shall be detailed in the annual report of the Board.

(i) The Board may establish and maintain such facilities as may be necessary for the transacting of its business. The Board may acquire, hold, and convey real and personal property and any interest therein.

(j) The Board shall adopt bylaws, rules, and regulations for the conduct of its business, and shall have the power to amend and rescind these bylaws, rules, and regulations. The Board shall publish its bylaws, rules, and regulations in convenient form and shall file a copy thereof, and shall also file a copy of any amendment thereto, with the appropriate agency or officer in each of the party states.

(k) The Board annually shall make to the governor of each party state, a report covering the activities of the Board for the preceding year, and embodying such recommendations as may have been adopted by the Board, which report shall be transmitted to the legislature of said state. The Board may issue such additional reports as it may deem desirable.

ARTICLE III. FINANCES

(a) The Board shall submit to the governor or designated officer or officers of each party state a budget of its estimated expenditures for such period as may be required by the laws of that jurisdiction for presentation to the legislature thereof.

(b) Each of the Board's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. Each of the Board's requests for appropriations pursuant to a budget of estimated expenditures shall be apportioned equally among the party states. Subject to appropriation by their respective legislatures, the Board shall be provided with such funds by each of the party states as are necessary to provide the means of establishing and maintaining facilities, a staff of personnel, and such activities as may be necessary to fulfill the powers and duties imposed upon and entrusted to the Board.

(c) The Board may meet any of its obligations in whole or in part with funds available to it under Article II(h) of this compact, provided that the Board takes specific action setting aside such funds prior to the incurring of any obligation to be met in whole or in part in this manner. Except where the Board makes use of funds available to it under Article II(h) hereof, the Board shall not incur any obligation prior to the allotment of funds by the party jurisdictions adequate to meet the same.

(d) Any expenses and any other costs for each member of the Board in attending Board meetings shall be met by the Board.

(e) The Board shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Board shall be subject to the audit and accounting procedures established under its bylaws. However, all receipts and disbursements of funds handled by the Board shall be audited yearly by a certified or licensed public accountant and the report of the audit shall be included in and become a part of the annual report of the Board.

(f) The accounts of the Board shall be open at any reasonable time for inspection to persons authorized by the Board, and duly designated representatives of governments contributing to the Board's support.

ARTICLE IV. ADVISORY COMMITTEES

The Board may establish such advisory and technical committees as it may deem necessary, membership on which may include but not be limited to private citizens, expert and lay personnel, representatives of industry, labor, commerce, agriculture, civic associations, medicine, education, voluntary health agencies, and officials of local, State and Federal Government, and may cooperate with and use the services of any such committees and the organizations which they represent in furthering any of its activities under this compact.

ARTICLE V. POWERS

The Board shall have power to—

(a) Encourage and promote cooperation among the party states in the development and utilization of nuclear and related technologies and their application to industry and other fields.

(b) Ascertain and analyze on a continuing basis the position of the West with respect to the employment in industry of nuclear and related scientific findings and technologies.

(c) Encourage the development and use of scientific advances and discoveries in nuclear facilities, energy, materials, products, by-products, and all other appropriate adaptations of scientific and technological advances and discoveries.

(d) Collect, correlate, and disseminate information relating to the peaceful uses of nuclear energy, materials, and products, and other products and processes resulting from the application of related science and technology.

(e) Encourage the development and use of nuclear energy, facilities, installations, and products as part of a balanced economy.

(f) Conduct, or cooperate in conducting, programs of training for state and local personnel engaged in any aspects of:

1. Nuclear industry, medicine, or education, or the promotion or regulation thereof.

2. Applying nuclear scientific advances or discoveries, and any industrial commercial or other processes resulting therefrom.

3. The formulation or administration of measures designed to promote safety in any matter related to the development, use or disposal of nuclear energy, materials, products, by-products, installations, or wastes, or to safety in the production, use and disposal of any other substances peculiarly related thereto.

(g) Organize and conduct, or assist and cooperate in organizing and conducting, demonstrations or research in any of the scientific, technological or industrial fields to which this compact relates.

(h) Undertake such nonregulatory functions with respect to non-nuclear sources of radiation as may promote the economic development and general welfare of the West.

(i) Study industrial, health, safety, and other standards, laws, codes, rules, regulations, and administrative practices in or related to nuclear fields.

(j) Recommend such changes in, or amendments or additions to the laws, codes, rules, regulations, administrative procedures and practices or local laws or ordinances of the party states or their subdivisions in nuclear and related fields, as in its judgment may be appropriate. Any such recommendations shall be made through the appropriate state agency, with due consideration of the desirability of uniformity but shall also give appropriate weight to any special circumstances which may justify variations to meet local conditions.

(k) Consider and make recommendations designed to facilitate the transportation of nuclear equipment, materials, products, by-products, wastes, and any other nuclear or related substances, in such manner and under such conditions as will make their availability or disposal practicable on an economic and efficient basis.

(l) Consider and make recommendations with respect to the assumption of and protection against liability actually or potentially incurred in any phase of operations in nuclear and related fields.

(m) Advise and consult with the federal government concerning the common position of the party states or assist party states with regard to individual problems where appropriate in respect to nuclear and related fields.

(n) Cooperate with the Atomic Energy Commission, the National Aeronautics and Space Administration, the Office of Science and Technology, or any agencies successor thereto, any other officer or agency of the United States, and any other governmental unit or agency or officer thereof, and with any private persons or agencies in any of the fields of its interest.

(o) Act as licensee, contractor or sub-contractor of the United States Government or any party state with respect to the conduct of any research activity requiring such license or contract and operate such research facility or undertake any program pursuant thereto, provided that this power shall be exercised only in connection with the implementation of one or more other powers conferred upon the Board by this compact.

(p) Prepare, publish and distribute (with or without charge) such reports, bulletins, newsletters or other materials as it deems appropriate.

(q) Ascertain from time to time such methods, practices, circumstances, and conditions as may bring about the prevention and control of nuclear incidents in the area comprising the party states, to coordinate the nuclear incident prevention and control plans and the work relating thereto of the appropriate agencies of the party states and to facilitate the rendering of aid by the party states to each other in coping with nuclear incidents.

The Board may formulate and, in accordance with need from time to time, revise a regional plan or regional plans for coping with nuclear incidents within the territory of the party states as a whole or within any subregion or subregions of the geographic area covered by this compact.

Any nuclear incident plan in force pursuant to this paragraph shall designate the official or agency in each party state covered by the plan who shall coordinate requests for aid pursuant to Article VI of this compact and the furnishing of aid in response thereto.

Unless the party states concerned expressly otherwise agree, the Board shall not administer the summoning and dispatching of aid, but this function shall be undertaken directly by the designated agencies and officers of the party states.

However, the plan or plans of the Board in force pursuant to this paragraph shall provide for reports to the Board concerning the occurrence of nuclear incidents and the requests for aid on account thereof, together with summaries of the actual working and effectiveness of mutual aid in particular instances.

From time to time, the Board shall analyze the information gathered from reports of aid pursuant to Article VI and such other instances of mutual aid as may have come to its attention, so that experience in the rendering of such aid may be available.

(r) Prepare, maintain, and implement a regional plan or regional plans for carrying out the duties, powers, or functions conferred upon the Board by this compact.

(s) Undertake responsibilities imposed or necessarily involved with regional participation pursuant to such cooperative programs of the federal government as are useful in connection with the fields covered by this compact.

ARTICLE VI. MUTUAL AID

(a) Whenever a party state, or any state or local governmental authorities therein, request aid from any other party state pursuant to this compact in coping with a nuclear incident, it shall be the duty of the requested state to render all possible aid to the requesting state which is consonant with the maintenance of protection of its own people.

(b) Whenever the officers or employees of any party state are rendering outside aid pursuant to the request of another party state under this compact, the officers or employees of such state shall, under the direction of the authorities of the state to which they are rendering aid, have the same powers, duties, rights, privileges and immunities as comparable officers and employees of the state to which they are rendering aid.

(c) No party state or its officers or employees rendering outside aid pursuant to this compact shall be liable on account of any act or omission on their part while so engaged, or on account of the maintenance or use of any equipment or supplies in connection therewith.

(d) All liability that may arise either under the laws of the requesting state or under the laws of the aiding state or under the laws of a third state on account of or in connection with a request for aid, shall be assumed and borne by the requesting state.

(e) Any party state rendering outside aid pursuant to this compact shall be reimbursed by the party state receiving such aid for any loss or damage to, or expense incurred in the operation of any equipment answering a request for aid, and for the cost of all materials, transportation, wages, salaries and maintenance of officers, employees and equipment incurred in connection with such requests: PROVIDED, That nothing herein contained shall prevent any assisting party state from assuming such loss, damage, expense or other cost or from loaning such equipment or from donating such services to the receiving party state without charge or cost.

(f) Each party state shall provide for the payment of compensation and death benefits to injured officers and employees and the representatives of deceased officers and employees in case officers or employees sustain injuries or death while rendering outside aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within the state by or in which the officer or employee was regularly employed.

ARTICLE VII. SUPPLEMENTARY AGREEMENTS

(a) To the extent that the Board has not undertaken an activity or project which would be within its power under the provisions of Article V of this compact, any two or more of the party states (acting by their duly constituted administrative officials) may enter into supplementary agreements for the undertaking and continuance of such an activity or project. Any such agreement shall specify the purpose or purposes; its duration and the procedure for termination thereof or

withdrawal therefrom; the method of financing and allocating the costs of the activity or project; and such other matters as may be necessary or appropriate.

No such supplementary agreement entered into pursuant to this article shall become effective prior to its submission to and approval by the Board. The Board shall give such approval unless it finds that the supplementary agreement or activity or project contemplated thereby is inconsistent with the provisions of this compact or a program or activity conducted by or participated in by the Board.

(b) Unless all of the party states participate in a supplementary agreement, any cost or costs thereof shall be borne separately by the states party thereto. However, the Board may administer or otherwise assist in the operation of any supplementary agreement.

(c) No party to a supplementary agreement entered into pursuant to this article shall be relieved thereby of any obligation or duty assumed by said party state under or pursuant to this compact, except that timely and proper performance of such obligation or duty by means of the supplementary agreement may be offered as performance pursuant to the compact.

(d) The provisions of this Article shall apply to supplementary agreements and activities thereunder, but shall not be construed to repeal or impair any authority which officers or agencies of party states may have pursuant to other laws to undertake cooperative arrangements or projects.

ARTICLE VIII. OTHER LAWS AND RELATIONS

Nothing in this compact shall be construed to—

(a) Permit or require any person or other entity to avoid or refuse compliance with any law, rule, regulation, order or ordinance of a party state or subdivision thereof now or hereafter made, enacted or in force.

(b) Limit, diminish, or otherwise impair jurisdiction exercised by the Atomic Energy Commission, any agency successor thereto, or any other federal department, agency or officer pursuant to and in conformity with any valid and operative act of Congress; nor limit, diminish, affect, or otherwise impair jurisdiction exercised by any officer or agency of a party state, except to the extent that the provisions of this compact may provide therefor.

(c) Alter the relations between and respective internal responsibilities of the government of a party state and its subdivisions.

(d) Permit or authorize the Board to own or operate any facility, reactor, or installation for industrial or commercial purposes.

ARTICLE IX. ELIGIBLE PARTIES, ENTRY INTO FORCE AND WITHDRAWAL

(a) Any or all of the states of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming shall be eligible to become party to this compact.

(b) As to any eligible party state, this compact shall become effective when its legislature shall have enacted the same into law: PROVIDED, That it shall not become initially effective until enacted into law by five states.

(c) Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect

until two years after the Governor of the withdrawing state has given notice in writing of the withdrawal to the Governors of all other party states. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

(d) Guam and American Samoa, or either of them may participate in the compact to such extent as may be mutually agreed by the Board and the duly constituted authorities of Guam or American Samoa, as the case may be. However, such participation shall not include the furnishing or receipt of mutual aid pursuant to Article VI, unless that Article has been enacted or otherwise adopted so as to have the full force and effect of law in the jurisdiction affected. Neither Guam nor American Samoa shall be entitled to voting participation on the Board, unless it has become a full party to the compact.

ARTICLE X. SEVERABILITY AND CONSTRUCTION

The provisions of this compact and of any supplementary agreement entered into hereunder shall be severable and if any phrase, clause, sentence or provision of this compact or such supplementary agreement is declared to be contrary to the Constitution of any participating state or of the United States or the applicability thereof to any government, agency, person, or circumstance is held invalid, the validity of the remainder of this compact or such supplementary agreement and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact or any supplementary agreement entered into hereunder shall be held contrary to the Constitution of any state participating therein, the compact or such supplementary agreement shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters. The provisions of this compact and of any supplementary agreement entered into pursuant thereto shall be liberally construed to effectuate the purposes thereof. [1969 c 9 s 1. Formerly RCW 43.31.400.]

Severability—1969 c 9: "If any provision of this act, or its application to any person or circumstance is held invalid, the remainder of the act, or the application of the provision to other persons or circumstances is not affected." [1969 c 9 s 6.]

RCW 43.21F.405 Western interstate nuclear compact—State board member—Appointment, term—May designate representative. The board member from Washington shall be appointed by and shall serve at the pleasure of the governor. The board member may designate another person as his or her representative to attend meetings of the board. [2009 c 549 s 5098; 1969 c 9 s 2. Formerly RCW 43.31.405.]

Severability—1969 c 9: See note following RCW 43.21F.400.

RCW 43.21F.410 Western interstate nuclear compact—State and local agencies and officers to cooperate. All departments, agencies and officers of this state and its subdivisions are directed to cooperate with the board in the furtherance of any of its activities pursuant to the compact. [1969 c 9 s 3. Formerly RCW 43.31.410.]

Severability—1969 c 9: See note following RCW 43.21F.400.

RCW 43.21F.415 Western interstate nuclear compact—Bylaws, amendments to, filed with secretary of state. Pursuant to Article II(j) of the compact, the western interstate nuclear board shall file copies of its bylaws and any amendments thereto with the secretary of state of the state of Washington. [1969 c 9 s 4. Formerly RCW 43.31.415.]

Severability—1969 c 9: See note following RCW 43.21F.400.

RCW 43.21F.420 Western interstate nuclear compact—Application of state laws, benefits, when persons dispatched to another state. The laws of the state of Washington and any benefits payable thereunder shall apply and be payable to any persons dispatched to another state pursuant to Article VI of the compact. If the aiding personnel are officers or employees of the state of Washington or any subdivisions thereof, they shall be entitled to the same workers' compensation or other benefits in case of injury or death to which they would have been entitled if injured or killed while engaged in coping with a nuclear incident in their jurisdictions of regular employment. [1987 c 185 s 15; 1969 c 9 s 5. Formerly RCW 43.31.420.]

Intent—Severability—1987 c 185: See notes following RCW 51.12.130.

Severability—1969 c 9: See note following RCW 43.21F.400.
